1．Equilibrium Chemistry．Calculate the ratio of HOCl and $\mathrm{OCl}-$ ．In solutions with following pH values（a） 6.0 （b） 7.0 （c）8．0．The pKa for HOCl is 7.5 ．（15 pts）

2．Water Softening．The water in table below is to be softened by lime softening．How many kgs of lime must be added to treat $50 \mathrm{~m}^{3}$ of the water and how many kgs of calcium carbonate will be precipitated？（ 15 pts ）．

| Concentration（mg／L） |  |  |  |
| :---: | :---: | :---: | :---: |
| Cation |  | Anion |  |
| $\mathrm{Ca}^{2+}$ | 100 | $\mathrm{HCO}_{3}{ }^{-}$ | 270 |
| $\mathrm{Mg}^{2+}$ | 5 | $\mathrm{Cl}^{-}$ | 50 |
| $\mathrm{Na}^{+}$ | 35 | $\mathrm{SO}_{4}{ }^{2-}$ | 45 |
|  |  | $\mathrm{NO}_{3}{ }^{-}$ | 10 |

3．Solubility．Anthrance has contaminated harbor sediments，and the solid portion of sediments is in equilibrium with the pore water．If the organic content of sediments is $5 \%$ and the solid sediment anthracence concentration is $50 \mu \mathrm{~g} / \mathrm{kg}$ sediment，what is the pore water concentration of anthracence at equilibrium？Assuming that the soil－water partition coefficient normalized to organic carbon is $4.32(\log \mathrm{Koc})$ ．$(20 \mathrm{pts})$ ．

4．Chemical Reaction Kinetics．Assuming the degradation of one organic pollutant in natural water environment follows the first－order kinetics．In one accident，this pollutant releases to water environment and remains $60 \%$ after 50 days．Please calculate（a）the half－life for this pollutant in natural water environment and（b）how long does it take to naturally degrade this pollutant to $20 \%$ remained．（ 15 pts ）

5．Chemical Reaction Stoichiometry．A synthesis gas，containing $6.4 \% \mathrm{CO}_{2}, 0.2 \% \mathrm{O}_{2}, 40 \% \mathrm{CO}$ ， and $50.8 \% \mathrm{H}_{2}$（the balance is $\mathrm{N}_{2}$ ），is burned with $40 \%$ dry excess air．What is the composition of the flue gas？（ 20 pts ）

6．Colloidal Chemistry．Please clearly explain properties of colloidal particles in surface water and removal mechanisms for colloidal particles using coagulation／flocculation in drinking water treatment．（ 15 pts ）
