

I. Complete the selected paragraph. (5%)

Then, the advantages 1 new technologies in the language classroom can only be interpreted in light of the changing goals of language education and the changing conditions in postindustrial society. Language educators now seek not only 2 students the rules of grammar, but rather to help them gain apprenticeship into new discourse communities. This is accomplished 3 creating opportunities for authentic and meaningful interaction both within and outside the classroom, and 4 students the tools for their own social, cultural, and linguistic exploration. The computer is a powerful tool for this process 5 it allows students access to online environments of international communication.
